

# AIRCRAFT INSTALLATION

## Project Airbus A318 FD special version v3

**Nota :** If you have already installed the "Airbus A318 Special Version V2, you must download the upgrade package called "Upgrade\_PA318FD\_V2\_to\_V3.zip" that you can found on the AVSIM library or FLIGHTSIM.COM library. There is a specific procedure for update the aircraft. You can also delete your old Version V2 and follow the instructions below. If you are not sure of your version, open the aircraft.cfg file, and you will see at the beginning of the file the version of the aircraft. You have also a "version.txt" file in the aircraft folder since this version V3.

**Unzip the PA318FD\_V3.zip file in a temp folder.**

You must have the following folders :

1. Copy the contents of the "\ Effects \" folder (a list of ". Fx" files ) in the "\ Effects \" FSX folder. If Windows ever asks you to overwrite existing files, say yes, because you'll have the latest versions of these files.
2. Copy the contents of the « \Gauges\ » folder ( « callout\_sound.dll » file ) in FSX « \Gauges\ » folder
3. « \Sound\ » folder iclude a sub folder called « \CALLOUT\_FD » : Copy this folder in the FSX « \Sound\ » folder. If you have already this folder, check its version ; There is a « version.txt » file inside the folder, that indicate the version ; The version of this package is the version 3.0 : Install or keep the newest version ; it is compatible with older versions.
4. « \SimObjects\ » folder has a sub folder called « \Airplanes\ » which content a folder : « \PA318FD\ » . Copy « PA318FD\ » and all sub-folders in «...Your FSX folder... \SimObjects\Airplanes\ ».

**Nota :** If you have a message that you already have files and Windows asks if you want to replace them, answer yes. Start FSX, it will ask you to accept the new gauge "Calloutsound.dll" (unless it was already installed on your machine): Accept.  
That's all

### Small bonus :

- Aircraft comes with the AES configuration file (Aeroport Ehanced Services) for those who use it.
- You will find in the aircraft folder a folder called « Ezdok Camera & vibs » ; there are in this folder some sepcific cameras and vibrations files for this aircraft if you use Ezdok Camera software..
- AES is COPYRIGHTED by AEROSOFT
- Ezdok Camera is COPYRIGHTED by EZDOK SOFTWARE
